

Installing on Windows

Download Unimus

Unimus for Windows is available in 2 versions:

- Standard installer
- Portable (standalone)

Download link:

<https://unimus.net/download.html>

For information on running Unimus in Portable mode, please [see this wiki article](#).

Standard installer

Running the installer will install Unimus on your computer - just like any other program. This includes installing Unimus as a service, so it will automatically run when your PC starts

To install Unimus, simply go through the install wizard.

Start using Unimus

Unimus will now run at <http://localhost:8085>, you can access it using your browser.
(substitute 'localhost' for the address of your Unimus server)

If this is the first time you run Unimus, we recommend checking out the [initial configuration guide here](#).
