Running in Docker

We recommend using a Docker image from:
https://hub.docker.com/r/croc/unimus

Please see the instructions available on the GitHub page for more info:
https://github.com/crocandr/docker-unimus

How to access Unimus

Unimus should be running at http://localhost:8085 and you can access it using your browser.
(substitute 'localhost' for the address of your Docker host if needed)

If this is the first time you run Unimus, we recommend checking out the initial configuration guide here.
