

Pricing

How does Unimus licensing work?

You need a license for each of your devices that will be added to Unimus.

Unimus licenses are paid yearly, and we offer both per-device licensing, and an unlimited license.

Free tier

5 device licenses are completely free, without any time limitation, or any other catch.

Each new registered account will contain the free licenses automatically.

After you use all the licenses in the free tier, you will need to purchase additional licenses to add more devices into Unimus.

Support

When you purchase an Unimus license subscription, it automatically includes a support contract.

All future updates to Unimus are also included in the subscription.

For more information on support, please check the details on [our pricing page](#).

Pricing

Unimus has separate pricing for the EU region, and for the rest of the world (non-EU countries).
(pricing in EUR and USD respectively)

To see the pricing, please head to [our pricing page](#).
